About this release

This document contains important information about the current release. We recommend that you read the whole document. McAfee® WebMER (Minimum Escalation Requirement) is a tool designed to collect product data from an endpoint to assist in analyzing and resolving issues.

Release date

August 10th, 2021

Release build

4.3.0.185

WebMER is designed for use on Microsoft Windows 7 and newer versions.

What's new in the 4.3 release

Enhancements

- MER-689: added support for Endpoint Security Storage Protection.
- MER-666: added support for passing RegEx arguments to the sanitize switch in the command line interface.

- /csanitize [1 | 2] [RegEx filename | Text to sanitize]
 - 1 = RegEx file with one regular expression per line
 - 2 = Comma separated regular expressions
 - Text to sanitize = Text is case sensitive
- MER-665: added support for updating to the latest WebMER executable in the command line interface via /update.

Resolved issues

See the table below for a list of issues resolved in this release of MER.

Reference	Resolution

Installation information

For usage information, see <https://kb.mcafee.com/agent/index?page=content&id=KB59385>.

Known Limitations

None.

Where to find product documentation

Go to docs.mcafee.com to find the product documentation for this product.
