About this document
Thank you for choosing this McAfee® product. This document contains important information about the current release. We strongly recommend that you read the entire document.

About this release
- Release Date: 8/14/2013
- Release Package: 2.3.10

This release was developed for use with McAfee Enterprise Mobility Management (EMM) Agent.

Operating systems:
- Google Android 2.2 to 4.2.x

Active Sync support:
- 2.5, 12.0, and 12.1

Make sure you have installed the correct version of the products in this list before using this release.

Features
Here’s a list of features delivered in this release:
- Sort contacts by first or last name
- Recognize, store, and dial phone numbers with post-dial sequences
- Filter messages in email folders

Fixed issues
Here’s a list of issues that we fixed in this release.
- In the Contacts list, the divider is now visible in the list view.
- In the Calendar view, pressing the back button now exits the app.
- When the locale is set to Japanese, search results for contacts are now displayed as "last name, first name."
- In Domino 8.5.2, after the invitee presses the Accept, Maybe, or Decline button from two invitation emails from the same sender, the last invitation email is no longer duplicated in the sender’s inbox.
- Secure Container now refreshes properly after deleting mails from Outlook Web Access.
- In Domino 8.5.2, the sync frequency now works properly.
In Domino 8.5.2, all events are no longer deleted after you delete a single event that was created in Secure Container.

The color indicator for tentative mail now changes when "Edit my response before sending" is used.

Messages queued in the Outbox folder are now sent automatically after switching from Offline to Online mode.

In Domino 8.5.2, only hyperlinks in an event note are tappable.

In the Calendar, accepting an invitation from an Out of Office, Free, or Tentative status, the status changes to Busy on the invitee’s side.

The status of an accepted invitation no longer displays as Busy for the invitee, regardless of the original event status.

The message "Application Not Responding" no longer displays after editing a few contacts.

In the Calendar, an event updated from Outlook is now updated in Secure Container.

In HTC Desire and S2, the poll time is now shown.

Secure Container no longer crashes after searching for a contact.

Details of an invitation email are no longer blank while creating a meeting invite from a live meeting.

In the messages list, the previous email icon now displays when viewing the first message.

The time on the day view grid now displays starting at the correct time.

When sending email logs in Japanese, Spanish, and French, the message no longer has English content appended.

The title of a PowerPoint file (.pptx) shows up in the right portrait or landscape view.

When opening a message in detailed view from the Drafts folder, the message header no longer changes to Inbox and the message count is now visible.

When Secure Container is locked, tapping the email notification no longer displays the Inbox screen before asking for the passcode.

When searching for a contact in the Global Address List, the names are no longer displayed twice.

All phone numbers are now highlighted in conference emails.

Navigation to the Inbox folder from the pull-down menu is now possible.

Secure Container no longer crashes when searching for contacts and tapping the X button frequently.

When opening a message, a line no longer momentarily displays in the email body.

When the locale is set to French, the Snooze, Dismiss, and Open buttons now display properly in calendar notifications.

In Domino 8.5.2, a name is now shown when changing an account name.

In the Out of Office settings screen, toast messages no longer display after changing the settings and turning off Wi-Fi.
In English and Japanese languages, the Draft folder search is now working.

The message “Retrieving your contacts” is no longer displayed continuously when searching for a contact in the Global Address List.

The messages “INBOX” and “POLL TIME XX:XX” no longer display in the top navigation bar.

The Cancel and Continue buttons now display in the right order when editing a reply.

In a WebEx invitation, a blank space no longer appears when selecting a meeting ID.

When a meeting invite is edited and forwarded, added phone numbers are now highlighted in the message body.

Meeting numbers are no longer recognized as the meeting ID when the phone number is located next to the meeting number keyword.

The Add Event screen no longer crashes when creating an event with the same email ID in the invitee field.

Some daily, monthly, and yearly recurring events edited from Secure Container are now updated in Outlook Web Access.

Events that contain a large amount of event details now open normally.

In the Calendar, events now maintain their original frequency or recurrence.

Details in invitation emails are no longer blank when creating a meeting invite from a live meeting.

The auto sync feature now works properly.

Instances of a recurring calendar event are no longer missing.

A pop-up no longer displays when selecting email messages with a long press.

The frequency of synchronization has been fixed.

Phone numbers in the subject of an email no longer remain highlighted after tapping the Read or Unread button.

The spinner no longer runs continuously when searching for a contact name in the Global Address List.

The unread counter for emails now displays correctly and in the right position.

Secure Container can now send messages larger than 20KB even when the SD card is full.

In Domino 8.5.3, contacts now continue to sync after restarting the device.

Duplicate messages no longer display in the Inbox during regular use of Secure Container.

In Chinese (PRC), the NEXT POLL text now appears localized.

An appropriate message is displayed when there are no log files.

When sending logs, the email message now reads “This is an auto-generated mail from McAfee Container”

A meeting invitation is no longer blank when the user is in the Cc and Bcc field.

Folder names are now shown in full, with trailing dots at the end for long folder names.

In the Calendar, pressing the Back button now exits the app.
- Email messages received are now displayed correctly when the body text is the same for both messages.
- Only the Conference Phone number displays in the call dialog when tapping a number.
- In the prompt to add a selected phone number to Contact list, extra numbers and characters are no longer included in the phone number.
- The 1-Touch conference bar now displays if a Cisco MeetingPlace ID is in the meeting invitation.
- Contacts synced with the native device are no longer deleted after performing a “Clear Data”.
- The text “INBOX” and “POLL TIME XX:XX” no longer display under the unread messages count in the top navigation bar.
- The entire poll time content is no longer truncated or hidden in the navigation area.
- On Moto Xoom and S2, the poll time is now displayed correctly.
- On tablets, poll time is no longer shown truncated.
- The Inbox randomly goes blank and some messages are no longer displayed, even after synchronizing.
- The selective wipe no longer fails on some Android devices.
- After upgrading to Secure Container 2.2.54, the contacts are now synced from the previous version when edited or deleted from Secure Container.

**Known issues**

Here’s a list of issues that are known in this release.

- On tablets, the widget hangs in landscape mode.
- The widget hangs unexpectedly when the app restarts.
- On Exchange 2003, inline attachments are not supported.
- Secure Container doesn’t support multiple widgets.

To view an updated list of issues associated with this release, see [KB76170](https://kc.mcafee.com/corporate/index?page=content&id=KB76170) in the McAfee Support online KnowledgeBase.

**Attachment viewer known issues**

Here is a list of known issues with the attachment viewer. There is no workaround for this release.

- Large attachments may take longer than normal to open.
- On the Motorola Xoom 3.0.1 device, the message “Out of memory” sometimes appears when you view an attachment.
- A black screen appears before you open an attachment.
- Attachments larger than 5 MB might appear garbled in the email body.

**General limitations**

Here is a list of the limitations reported in this release.

- Only the first 100 results are displayed when searching the server.
• When you update a contact’s address in OWA, it does not automatically update the address in McAfee Secure Container.
• You cannot open file attachments from the Outbox.
• On a tablet, you cannot call or send text messages from the device contacts.
• When you search the Global Address List using a pattern, the results displayed match only the first characters of the pattern. For example, to find a word like “search”, use the pattern “sea” instead of “ear”.

Exchange limitations
Here is a list of the limitations for the Exchange 2003 server.
• The Autodiscover command is not supported.
• The ability to view attendee status for meetings is not supported.
• Email messages formatted in HTML are not supported. Only plain text messages are supported.
• Policies such as Enable Password Recovery, Allow Simple Password, Password Expiration (Days), and Enforce Password History are not supported.
• Searching for keywords in a mailbox is not supported.
• Email messages are downloaded in their entirety only during sync.

Domino server limitations
Here is a list of the limitations for the Domino server.
• The Draft, Junk, and Outbox folders do not display in the Folder list after a sync.
• The Deleted Items folder does not sync.
• Large emails are downloaded at once in their entirety, instead of getting truncated.
• You’ll need to download attachments first before forwarding with SmartForward.
• The Inbox displays a blank Calendar body.
• Calendar items must be forwarded as email items.
• You must enter at least 4 characters when you search in the Global Address List.
• The email content search does not work on the server.
• Calendar messages appear as email messages in the Sent Items folder.
• Inline attachments are not visible.
• Meetings longer than 24 hours are not supported.

Installation instructions
Here are the installation instructions for McAfee Secure Container.

Requirements
Your Android device must meet these minimum system requirements to run McAfee Secure Container:
• EMM Agent. Remember to use the same signed EMM agent.
• Google Android 2.2 to 4.2.x
• 25 MB or more of memory space.
• GPRS, Wi-Fi, or any packet data connection.

Installing on your Android device
You can install McAfee Secure Container on your Android smartphone or tablet.

1 On your device launcher or application screen, tap the Play Store application icon.
2 Press the Search icon, and then search for McAfee Secure Container.
3 Follow the on-screen instructions.
4 You can also download and install McAfee Secure Container by going to the Get Recommended Apps section of the EMM Agent once you’re logged in to the McAfee EMM Agent app on your Android device.

Files included in this release
This release includes the following files:
Container_v2.3.10.apk
