About this release

This document contains important information about the current release. We recommend that you read the whole document.

New features

Java 1.8.0_131 Support

McAfee Enterprise Security Manager supports the latest Oracle Java runtime environment.

SMB2 support

In response to the WannaCry threat, Microsoft advised disabling the SMB1 protocol. When SMB1 is disabled, some data sources are unable to communicate with McAfee devices.

This SIEM release supports SMB2, which re-enables communication with these data sources. Two Content Packs have been updated to help identify potential WannaCry activity – Exploit Content Pack and Suspicious Activity Content Pack. Search the Knowledge Center for KB85403 and KB88776.

Following Microsoft's recommendation results in communication with some data sources being lost. Upgrading to the 10.0.3 release re-establishes communication with the lost data sources.
1. Follow Microsoft recommendations for disabling SMB1 and enabling SMB2 (see Microsoft for details).

2. Upgrade to ESM 10.0.3.

3. Verify data source connectivity.

---

**Instructions for upgrading**

Upgrading to this release requires preparation and an understanding of how the upgrade process works. Read the upgrade instructions in the McAfee Enterprise Security Manager 10.0.0 Installation Guide (PD26817), on the Knowledge Center.

Before you can upgrade:

- Verify that your current McAfee ESM version is 9.6.x (or later).
  
  You can only upgrade to 10.0.x from 9.6.x.

- Remove Nitro IPS devices from the McAfee ESM System Tree.
  
  You cannot upgrade to 10.0.x with a depreciated Nitro IPS device.

---

**Find product documentation**

On the ServicePortal, you can find information about a released product, including product documentation, technical articles, and more.

**Task**

1. Go to the ServicePortal at https://support.mcafee.com and click the Knowledge Center tab.

2. In the Knowledge Base pane under Content Source, click Product Documentation.

3. Select a product and version, then click Search to display a list of documents.

**Tasks**

- Use ESM Help on page 3
  Have questions about how to use ESM? Use the online Help as your context-sensitive information source, where you find conceptual information, reference materials, and step-by-step instructions on how to use ESM.

- Frequently asked questions on page 4
  Here are answers to frequently asked questions.

**Find localized information**

We provide localized (translated) McAfee ESM release notes, Help, product guide, and installation guide for:

- Chinese, Simplified
- Chinese, Traditional
- English
- French
- German
• Japanese
• Korean
• Portuguese, Brazilian
• Spanish

Access localized online Help
Changing the language setting in ESM automatically changes the language used in the online Help.
1 Log on to ESM.
2 On the system navigation pane of the ESM console, select Options.
3 Select a language, then click OK.
4 Click the Help icon in the upper right corner of the ESM windows or select the Help menu. The Help displays in the language you selected.

If the Help appears in English only, localized Help is not yet available. A future update installs localized Help.

Find localized product documentation on the Knowledge Center
1 Visit the Knowledge Center.
2 Search for localized product documentation using the following parameters:
   • Search terms — product guide, installation guide, or release notes
   • Product — McAfee Enterprise Security Manager
   • Version — Choose a release version
3 In the search results, click the relevant document title.
4 On the page with the PDF icon, scroll down until you see language links on the right side. Click the relevant language.
5 To open the localized version of the product document, click the PDF link.

Use ESM Help
Have questions about how to use ESM? Use the online Help as your context-sensitive information source, where you find conceptual information, reference materials, and step-by-step instructions on how to use ESM.

Task
1 To open ESM Help, do one of the following:
   • Select the menu option Help | Help Contents.
   • Click the question mark in the upper right of ESM screens to find context-sensitive Help specific to that screen.
2 From the Help window:
   • Use the Search field to find any word in the Help. Results appear below the Search field. Click the relevant link to display the Help topic in the pane on the right.
   • Use the Contents tab (table of contents) to view a sequential list of topics in the Help.
   • Use the Index to find a specific term in the Help. Keywords are organized alphabetically so you can scroll through the list until you find the keyword you want. Click the keyword to display that Help topic.
• Print the current Help topic (without scroll bars) by clicking the printer icon in the upper right of the Help topic.
• Find links to related Help topics by scrolling to the bottom of the Help topic.

**Frequently asked questions**

Here are answers to frequently asked questions.

**Where can I find ESM information in other languages?**

We localize the ESM release notes, Help, product guide, and installation guide. Find localized information on page 2

**Where can I learn more about McAfee ESM?**

- Use ESM Help on page 3
- Visit the Knowledge Center
- Visit the Expert Center
- Watch McAfee ESM videos

**Which data sources are supported?**

Visit the McAfee ESM website

**How do I configure specific data sources?**

Find current data source configuration guides on the Knowledge Center

**Where can I learn more about McAfee ESM content packs?**

For information about content packs, refer to the following KB articles on the Knowledge Center:

- KB83783 - How to implement SIEM Content Packs
- KB84036 – FAQs for SIEM content packs
- KB75608 - Register for this KB to see what is in the latest content packs.
