	Citrix XenDesktop	7.6 Patch 3 (PVS), 7.11, and 7.15 LTSR Cumulative Update 1 (CU1)
	VMware Horizon	7.4

What's new

The current release of the product includes these enhancements and changes.

Microsoft Windows 10 support

This McAfee DLP Endpoint release supports Microsoft Windows 10 October 2018 Update 32-bit and 64-bit operating systems.

Resolved issues

The current release of the product resolves these issues. For a list of issues fixed in earlier releases, see the Release Notes for the specific release.

McAfee DLP extension for McAfee ePO issues

Reference	Description
1251115	McAfee DLP rule editor is now correctly displayed when the McAfee ePO URL is added to the local intranet.
1250616	The Test Connection button now works correctly when testing database repository definitions.
1251704, 1251294	Generating a bypass or uninstall key with Help Desk no longer generates the Failed to generate the selected key error message. This issue is the McAfee DLP extension corollary of 1251294.
1247501	Users are now able to access the DLP Permission Sets for Incidents and Cases by the permissions assigned to them.

McAfee DLP Endpoint issues

Reference	Description
1221100	Printer protection rules can now include an exception for image printer Save as PDF (for Windows Excel files only).
1247090	A screen capture protection rule with a location-based content fingerprinting classification is enforced even when the user is browsing in the location. Prior to this update the rule could only be enforced on a file copied from the location. The rule is now enforced by disabling the preview pane.
1247465	Content fingerprinting classifications are now applied to Microsoft Office files opened directly from browsers.
1241658	Devices are no longer blocked when there is an exclusion in the rule.
1244144	VCF files (Microsoft Outlook contact files) are now supported for text extraction. The issue was caused by the files being incorrectly classified as Encrypted_Unsupported .
1253293	Enabling the Internet Explorer Extension in the McAfee DLP Endpoint client no longer causes a performance issue.
1249394, SB10252	Notification and justification windows now appear behind the lock screen, not on top of it. Right-click and keyboard shortcuts are now disabled in notifications and justifications.
1255569	The procedure for detecting process names has been enhanced.

Installation information

For information about installing or upgrading McAfee DLP 11.0 Update 6 software, see the [McAfee DLP Endpoint 11.0.500 Installation Guide](#).

The recommended installation of the client software uses the McAfee ePO infrastructure for deployment to the endpoints.

You can also deploy McAfee DLP Endpoint client software to your network using third-party enterprise software deployment tools.

Known issues

For a list of known issues in this product release, see this McAfee Knowledge Base article: [KB89301](#).

Additional known issues

Reference	Description
1230439	In the McAfee DLP Endpoint client DLP Endpoint Console Notifications History , when viewing notification message entries, the message on view sometimes displays incorrectly (message window displays blank).

Getting product information by email

The Support Notification Service (SNS) delivers valuable product news, alerts, and best practices to help you increase the functionality and protection capabilities of your McAfee products.

To receive SNS email notices, go to the SNS Subscription Center at https://sns.secure.mcafee.com/signup_login to register and select your product information options.

Where to find product documentation

Go to docs.mcafee.com to find the product documentation for this product.

Go to support.mcafee.com to find supporting content on released products, including technical articles.
