Rating for the 10.6.1 February update

The rating defines the urgency for installing this update.

Purpose

This release adds enhancements and fixes problems that were reported in the previous version.

Rating – High Priority

Mandatory	Critical	<u>High Priority</u>	Recommended
-----------	----------	----------------------	-------------

- High priority for all environments.
- Failure to apply a High Priority update might result in potential business impact.
- Most patches and hotfixes are considered High Priority.

For more information, see [KB51560](#).

What's new in the 10.6.1 February update

This update addresses customer-reported issues, memory consumption issues, and product, scanner and installer stability issues.

This release includes the following build numbers:

Component	Version
Endpoint Security Platform	10.6.1.1206
Endpoint Security Platform extension	10.6.1.1085
Endpoint Security Threat Prevention	10.6.1.1273
Endpoint Security Threat Prevention extension	10.6.1.1076
Endpoint Security Firewall	10.6.1.1157
Endpoint Security Firewall extension	10.6.1.1064
Endpoint Security Web Control	10.6.1.1120
Endpoint Security Web Control extension	10.6.1.1064
Endpoint Security Adaptive Threat Protection	10.6.1.1164
Endpoint Security Adaptive Threat Protection extension	10.6.1.1071
Endpoint Security Migration Assistant extension	10.6.1.1021

Resolved issues in the 10.6.1 February update

This update resolves known issues from the previous releases of the product.

Threat Prevention

Component	Reference	Resolution
Scanning	1238723	This release resolves an issue that prevented DAT updates from completing successfully.
	1259361	The Access Protection rule "Running files from common user folders" no longer triggers while browsing the directory structure.
Performance	1256356	When the On-Demand Scan option Scan only when the system is idle is enabled, the scan no longer randomly resumes when the user is active.
Interoperability	1249089	Exploit Prevention exclusions now work correctly with signer details as the Signer value is now processed as is from the events.

	1255629	This release resolves a compatibility issue with iTunes.
	1256932	Application Protection rules now successfully migrate to McAfee® Endpoint Security Threat Prevention settings using ESConfigTool.
User Interface	1245285	The Threat Target file name now appears in the event sent to McAfee® ePolicy Orchestrator® (McAfee® ePO™) and the Access Protection log.
	1250643	The permission set to view Access Protection subrules now functions correctly.
	1251048	1095 events are now parsed correctly.
	1254936	Endpoint Security properties, such as Extra.DAT and On-Demand Scan properties, are now displayed correctly in McAfee ePO.
	1255614	1292 events are now parsed correctly.
	1260437	The Threat Event Log no longer capitalizes the encoded string in the source description of Exploit Prevention events.
	1260759	The Threat Event log in McAfee ePO now reports the complete MAC address.

Firewall

Component	Reference	Resolution
Interoperability	1228817	McAfee ePO now updates policies containing remote networks from the Firewall Catalog when the network is modified in the catalog.
	1255248	Internal IP traffic is no longer blocked by McAfee® Global Threat Intelligence™ (McAfee GTI) when the option If McAfee GTI rating server is not reachable, Block traffic is selected.
	1245608	Third-party signers are now correctly parsed by firewall rules.
	1256757	You can now successfully add IPv6 addresses under trusted networks in a rule.
Network and Security	1261616	VPN connection is no longer interrupted on Microsoft Windows 10 systems.
User Interface	1260017	When adding or editing firewall rules, an error no longer occurs when you save the policy.

Web Control

Component	Reference	Resolution
User Interface	1252046	McAfee® Endpoint Security Web Control events containing URLs are now parsed correctly by McAfee ePO.

Adaptive Threat Protection

Component	Reference	Resolution
Performance	1257884	This release resolves a memory leak with mfeatp.exe.

Migration

Component	Reference	Resolution
Interoperability	1258613	The Endpoint Migration Assistant now retains existing assigned Endpoint Security tasks.
