Rating for the 10.5.5 February update

The rating defines the urgency for installing this update.

Purpose

This release adds enhancements and fixes problems that were reported in the previous version.

Rating – High Priority

Mandatory	Critical	<u>High Priority</u>	Recommended
-----------	----------	----------------------	-------------

- High priority for all environments.
- Failure to apply a High Priority update might result in potential business impact.
- Most patches and hotfixes are considered High Priority.

For more information, see [KB51560](#).
