Rating

The rating defines the urgency for installing this hotfix.

Rating - Mandatory

<u>Mandatory</u>	Critical	High Priority	Recommended
------------------	----------	---------------	-------------

- Required for all environments.
- Failure to apply Mandatory updates might result in a security breach.
- Mandatory updates and hotfixes resolve vulnerabilities that might affect product functionality and compromise security.
- You must apply these updates to maintain a viable and supported product.

For more information, see [KB51560](#).

Important

The attached files are provided as is, and with no warranty either expressed or implied as to their suitability for any particular use or purpose. McAfee assumes no liability for damages incurred either directly or indirectly as a result of the use of these files, including but not limited to the loss or damage of data or systems, loss of business or revenue, or incidental damages arising from their use. Hotfix files should be applied only on the

advice of Technical Support, and only when you are actually experiencing the issue being addressed by the hotfix. Hotfix files should not be proactively applied in order to prevent potential product issues. You are responsible for reading and following all instructions for preparation, configuration, and installation of hotfix files. Hotfix files are not a substitute or replacement for product Service Packs, which may be released by McAfee. It is a violation of your software license agreement to distribute or share these files with any other person or entity without written permission from McAfee. Further, posting of McAfee hotfix files to publicly available Internet sites is prohibited. McAfee reserves the right to refuse distribution of hotfix files to any company or person guilty of unlawful distribution of McAfee software products. Questions or issues with McAfee hotfix files should be directed to Technical Support.

Resolved issues

This release resolves known issues from the previous releases of the product.

Threat Prevention

Reference	Resolution
1240838	Quarantine folder and log folders are now updated during install time.

Installation instructions

For information about installing or upgrading Endpoint Security software, see the *McAfee Endpoint Security Installation Guide*.

Requirements

Make sure that your system meets these requirements before installing the software.

- McAfee Endpoint Security 10.5.3 must be installed on your system.
- Administrator privileges are required to install this hotfix.
- AMCore content up to date.

Component	Version (RTW)
Endpoint Security Platform	10.5.3.3178
Endpoint Security Firewall	10.5.3.3108
Endpoint Security Threat Prevention	10.5.3.3264
Endpoint Security Web Control	10.5.3.3087
Endpoint Security Adaptive Threat Protection	10.5.3.3113

Endpoint Security 10.5.3 Hotfix 1240838 lists these products and versions in the Master Repository on the McAfee ePO server.

Product	Type	Version	Minor version
Endpoint Security Platform	Hotfix	10.5.0	1240838
Endpoint Security Firewall	Hotfix	10.5.0	1240838
Endpoint Security Threat Prevention	Hotfix	10.5.0	1240838
Endpoint Security Web Control	Hotfix	10.5.0	1240838
Endpoint Security Adaptive Threat Protection	Hotfix	10.5.0	1240838

Endpoint Security 10.5.3 Hotfix 1240838 lists these products and versions in the **About** dialog box of Endpoint Security, and McAfee ePO product properties.

Product	Version	Hotfix number
Endpoint Security Platform	10.5.3.3276	1240838
Endpoint Security Firewall	10.5.3.3151	1240838
Endpoint Security Threat Prevention	10.5.3.3334	1240838
Endpoint Security Web Control	10.5.3.3108	1240838
Endpoint Security Adaptive Threat Protection	10.5.3.3148	1240838

Install the hotfix on your McAfee ePO server

The modules that are installed on your system determine which hotfixes are installed.

Task

- 1 Log on to McAfee ePO as administrator.
- 2 Download and check these packages in McAfee ePO.

Note: You must check in Endpoint Security Platform first.

- Endpoint_Security_Platform_10.5.3.3276.1_1240838.zip
- Firewall_10.5.3.3151.3_1240838.zip
- Threat_Prevention_10.5.3.3334.4_1240838.zip
- Web_Control_10.5.3.3108.3_1240838.zip
- Adaptive_Threat_Protection_10.5.3.3148.2_1240838.zip

- 3 In the Client Task Catalog, create a McAfee Agent: Product Update task.
- 4 From the **Patches and service packs** section, select the Endpoint Security modules.

Note: You do not need to select the Endpoint Security Platform module; it automatically updates before the first Endpoint Security module update.

- 5 Assign the update task.

- 6 Send a McAfee Agent wake-up call, then select **Force complete policy and task update** so the task runs on the client. Otherwise, the task will run at the next agent-server communication interval.

Install the hotfix on self-managed systems

Task

- 1 Download and unzip the EndpointInstaller_10.5.3.3168.2.zip file to a temporary folder on your system.
- 2 Double-click the setupEP_HF.exe file and follow the instructions.
- 3 (Optional) Download and install Adaptive Threat Protection:
 - a. Download and unzip the Adaptive_Threat_Protection_10.5.3.3148.2_1240838.zip to a temporary folder on your system.
 - b. Double-click the setupATP.exe file.

Verify that the hotfix installed correctly

From the client system

The installed hotfix isn't listed in the default **Programs and Features** list in the Control Panel.

To verify that the hotfix installed correctly or to view details about the hotfix:

- From the Control Panel on the client system, select **View Installed Updates**.
- You can view the hotfix details by selecting **About** in the Endpoint Security Client.

From McAfee ePO

To verify that the hotfix installed correctly or to view details about the hotfix:

- From the System Tree, select the system, click **Products**, then view the **Properties**.

Notes

- Removing the hotfix isn't supported.
- The hotfix is removed when a module is uninstalled.
